www.jmstorage.co.uk

Please note in the case of pallet racking or heavy duty longspan products, beams are sold individually rather than pairs, however any given maximum loading capacities are per pair of beams. Maximum loading capacities given for frames and/or beams may be limited by other factors within the overall design of the system and are entirely dependent on the run lengths, height to first beam, number of beam levels and individual manufacturer guidelines. The customer is responsible to ensure the correct design, configuration and installation of materials are in line with manufacturers guidelines, such that load capacities for the end user are sufficient. If you are in doubt, please check this with J&M Storage Systems Ltd. The customer is responsible to ensure appropriate PPE is worn when installing, handling or using the storage equipment sold by J&M Storage Systems Ltd. User and Installation Guides are available on request. Subject to our terms and conditions available upon request or download from www.jmstorage.co.uk

Quickspan

Heavy Duty Longspan

The perfect solution for manually storing small to medium size products. The Quickspan range is extremely versatile offering strength, durability and stability.

- Quick and simple to install
- Choice of chipboard or steel shelving

The load capacities are calculated when the load is uniformly distributed over the two beams. Load capacities must be confirmed at time of order and may vary depending on system configuration. Chipboard supports should be used, these should be spaced at a maximum of 500mm apart. The customer is responsible to ensure appropriate PPE is worn when installing, handling or using the storage equipment sold by J&M Storage Systems Ltd. User and Installation Guides are available on request.

HEAVY DUTY LONGSPAN

QUICKSPAN

Speedrack

Pallet Racking System

The Speedrack pallet racking system enables quick access to products stored on pallets. A wide range of sizes, load capacities and accessories help Speedrack to be assembled to suit any space and store any product regardless of size or weight.

- Manufactured to FEM standards
- Very high load capacities
- Column guards, rack end protectors and mesh shelving available for added rack safety
- Suitable for logistic operators, warehouses and manufacturing
